Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The amendment received 5/5/2003 and the Change of Address received 6/2/2003 have been entered and claims 8-24 are currently pending in this application. Priority is granted to 08 October 1998, please update the specification accordingly.

In view of the arguments presented and amendments to the claims, the rejections of record under 35 USC 102(b) over Weisheit and obviousness double patenting are hereby withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 8-24 are rejected under 35 U.S.C. 102(a) as being anticipated by Siedel.

Siedel (6,013,467) entitled ~~✖~~Blood Substitute Suppression by Peroxides~~✖~~ published 1/1998, teaches in column 1, determining alkaline phosphatase where hemoglobin is present in the sample, usually >500 mg/dl. Higher levels can occur. In column 2 line 27, optical measurements may be determined at wavelengths of 450 nm. In column 3 a blank value correction can be carried out by subtracting the blank signal obtained in the same measurement period in a parallel test with a chromogen free reagent. The

blank value correction is carried out by subtracting a kinetic blank value. In column 4 first full paragraph, 4-nitrophenyl phosphate for determining alkaline phosphatase is taught. See claim 15 in column 10. Modified hemoglobins are shown including diaspirin cross-linked hemoglobin. See claim 5 in column 10.

All the features of the claims are taught by Siedel for the same function as claimed.

Applicant's arguments filed 6/2/2003 have been fully considered but they are not persuasive.

Applicants argue that Siedel does not teach the claimed correction factor using a rate blank method.

It is the examiner's position that Siedel teaches a blank value correction for the same function as claimed. And such calibration and control techniques are old in this art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing

• date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
